WOLVES OF THE NORTHERN ROCKIES

THE BIG BAD PROJECT

First, choose 10 different colors. & shade in the circles at the bottom. Then, FIND points 1-5 on your map, shade in the matching color, & write the coordinate (x,y). After, use the coordinates & your colors to PLOT the remaining destinations. Last, label locations.

Wolves of the Northern Rockies are currently not protected by the Endangered Species Act. This map highlights some of the greatest places to visit to support wolf ecotourism.
